

Environmental Management

LTE is a leader in the development of Environmental Health and Safety Management Systems (EHS-MS).

EHS-MS provide a framework for effective management of corporate environmental health and safety obligations including compliance with laws and regulations.

LTE's specialized EHS expertise and strong working knowledge of industrial processes helps corporations meet EHS-governance objectives safely and efficiently.

EHS-MS Services

Policy & Procedures Development
 Gap Analysis of Current Systems
 New System Development
 Compliance & Facility Auditing

System Performance Documentation
 Contractor Program Management
 EHS-MS Training

LTE's Integrated Management Systems will help you:

- Simplify**
EHS management processes
- Engage**
meaningful participation from all stakeholders
- Achieve**
compliance with corporate objectives
- Improve**
long term program efficiency

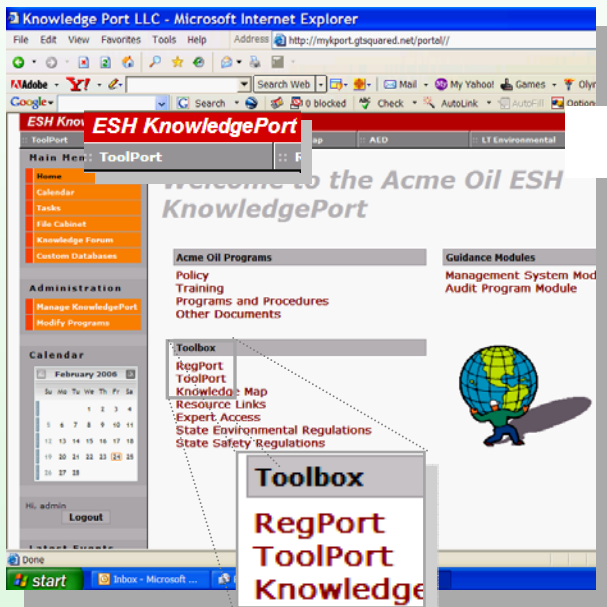

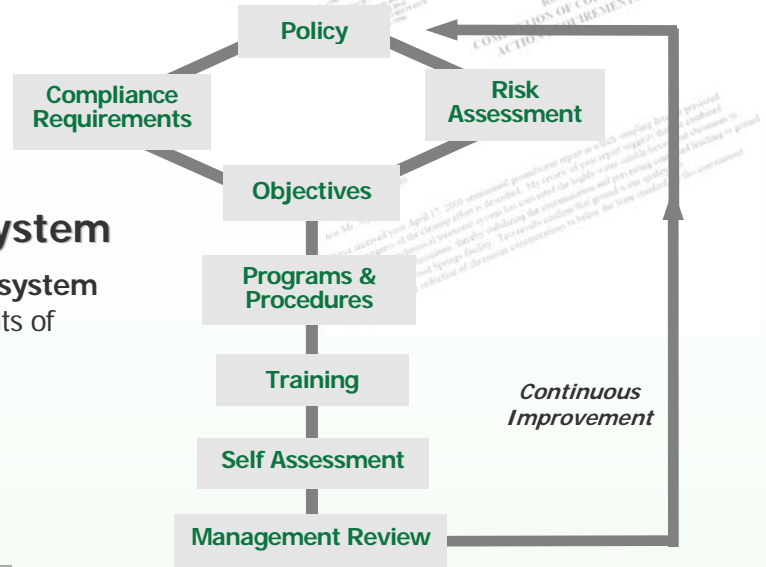

Beyond Compliance

A properly designed EHS-MS moves companies through compliance and beyond, **improving efficiency and competitiveness** while **reducing costs and liability risks**.

Investigative Program
Remediation Services Management
Environmental Management
Construction Management

Successful EHS Management System

Fully implemented, an **efficient system** will meet substantive requirements of **ISO14000 and OSHA VPP**.

Web-Based EHS Support System

KnowledgePort® is "EHS Central"
Everything you need to conduct your EHS program effectively and safely

In keeping with **LTE's leadership** in the environmental industry, LTE has partnered with **KnowledgePort, LLC** to develop a web-based EHS support system.

KnowledgePort® has all the necessary components to allow corporations to maintain a **world-class EHS-MS**.

RegPort® - evaluate regulatory requirements & assess operational compliance with direct access to Federal & State regulations.

ToolPort® - simplify program evaluation.

RiskAssess® - identify & rank hazard levels & associated existing hazard controls; prioritize potential EHS risks.

Knowledge Controls – organize & share information internally & with strategic partners.

Identify Risk
Quantify Risk
Maintain Compliance
Reduce Liability
Reduce Costs

LTE has successfully developed and implemented EHS-MS programs nationwide.

Comprehensive Corporate EMS Governance Program

Major Utility Company

- Redesigned vision for industry-leading safety performance
- Comprehensive in-house knowledge management
- Incorporated risk assessment and auditing tools

EHS-MS
Assessment
Development
Implementation
Documentation

EMS Program Audit

Aerospace Industry

- ISO 14000 standards
- Provided gap analysis and recommendations
- Documented EMS program personnel involvement

EHS Compliance Auditing & Corrective Action Tools

Oil Field Manufacturing and Service Company

EHS compliance tool to support corporate policy for 200 facilities

- Identified safety and environmental compliance issues
- Incorporated risk factors to help prioritize capital expenditures
- Developed procedures to document accountability
- Performance tracking to demonstrate compliance

Programs resulted in a significant reduction in number of spills and non-report violations.

Safety and Spill Response Reporting Program

Oil and Natural Gas Producer

Safety and spill response program for OSHA hazardous substances

- Identified federal, state and local requirements
- Developed emergency spill response procedures
- Prepared personnel safety plans
- Designed customized emergency response cards
